

EPR
(Extended Producers Responsibility)

Beyond Basic Compliance

Join Our Bi-Weekly Q&A Session

Environmental Compliance and the associated Complexities.

EPR levied currently on Plastic Waste, Electronic Waste, Battery Waste and Tyre could be extended on other Polluting materials. Compliance Management, with the frequent policy changes often becomes a hurdle to the Core Business Management.

For better management, A Compliance Vertical as your business extension with expertise on the subject, support to reduce cost burden, ability to manage necessary communication and a complete support on EPR becomes inevitable.

We have the capability to guide you through any EPR related challenges.

Plastic EPR

E-Waste EPR

Battery EPR

Tyre EPR

What is EPR Compliance?

Imagine the circumstance where products in the market and the waste-generated from it are properly channelised instead of ending in a waste dump or landfills.

EPR Compliance is a MANDATE for Producers, Importers and Brand Owners(PIBOs) to channelise the plastic Packaging waste, e-waste, battery waste and tyre waste generated to registered Recyclers for environmentally sound management of waste.

According to EPR Guideline, issued by CPCB under Fourth Amendment to Plastic Waste Management Rules 2016, it is now compulsory for entities to get certified and fulfil their liabilities.

In other words, Extended Producers' Responsibility(EPR) is an OPPORTUNITY that puts the power of sustainability and waste management in your hands.

Currently, EPR covers the following product lines

Plastic Packaging EPR

Plastic packaging waste be responsibly processed

Electronic Waste EPR

To Channelise Used electrical and electronic equipment to refurbishers, dismantlers and recyclers sustainably

Battery Waste EPR

To Dispose off the Battery Waste responsibly

Tyre EPR

For Environmental Sound management of Tyre waste

What's in it if EPR Registered?

Smooth Business Flow

Staying compliant will ensure smooth transaction of business

Reputation and Recognition

Positive image of eco-friendly and social consciousness will help you stand out to consumers and investors

Better Legal Protection

Entities do not have to face legal challenges or any penalties for non-compliances

Transparent Collaboration

Entities(PIBOs) can collaborate with Recyclers/PWPs for sustainable management of waste

EPR Authorization Process:

FAQs

Is EPR mandatory for MSME?

For EPR Plastic - if you are a Brand Owner falling under Micro or Small Category Enterprises, you are exempted.
EPR E-Waste - The Micro Scale Enterprises are exempted for EPR E-Waste Registration.

What if an entity is not registered for EPR?

How to reduce burden of EPR targets?
